Well i have set up a FDS server , It is running fine and all. But i have been requested to run Renguard on it, and in order to run Renguard i need to install BRenbot. I have searched through these forums looking for answer, i did find Zunnie's tutorial. But unfortunately the picture's do not show. Which causes alot of confusion. I have added , you Zunnie. to my Msn and hopefully i can get some help from you and the community. People plz post tutorials or help ideas please. Thnx for your time.

Please reply as soon as possible, and here the link to Zunnie's tutorial, and as you can see. The picture do not show up.

you dont need BrenBot to run RenGuard

but if you want some help go to irc.n00bstories.com in channel #BHS_Support and ill be happy to help

I made this, maybe it will help you.

Its for Linux brenbot tho but its almost the same as windows...

http://www.fanmaps.net/downloads/brenbot/BRenBotTut.exe

There you can download the same tutorial but WITH pictures.

Sorry for my late reply but i wasnt able to login on the forum for a few days :S
