In Brenbot is there a way to stop a vote as a mod when someone starts one? The amount of times I see someone being kicked for GTA when its clear from IRC they just bought a vehicle, I would love to be able to cancel the vote.

Disable voting in brenbot.cfg, to do so change the VotingEnabled = value from 1 to 0. It's better to have more mods, rather than voting enabled.

We just use voting for when no mods want to play, and switch it off when we are in-game.

Good news Mac. Looking forward to 1.36.

You mean to tell me you put a poll feature in with no way to halt one?
