Hi

I know there have been a few... but this is different.

Is it possible to play a sound when you AREN'T playing in a renguard protected server?
Something like "Caution: you are playing in an unprotected server"

And also maybe another sound used when you connect to an 'half-assed' protected server? Like
"You are connected to a half-renguard server".

Either that or some kind of private message which gets sent to you.

Peace

CM

Edit: As an afterthought... maybe also include support for 'custom' sounds for mods such as Renalert or Reborn when they include Renguard. Something like "Welcome comrade to a protected server" would add to the environment that the mods are trying to create.
