I got asked to open up a server on renegade demo since they only have like 2 servers there(4,6 players) and full got 80servers on gamespy, so I did open up a 32 player server for the demo ppl.

Now for my question.

1. How do I dissable the 2nd mobius skin so you cant buy that on gdi, since if you do the server crash.

2. Option to dissable nuke/ions placeing in PTS so they cant be dissarmed?
(Edited)

3. Is it possible to make brenbot or anyother remote tool to work with demo so other ppl can control the server and kick cheaters out?
Renrem32, br, FDSweb, renstat.??

Thx for any reply.

Silent KaneWho would host a server for the demo?!

Thx again, that dident help me either.
I dont see the point where I have to justify my action to host a server for the demo ppl.

I have been hosting on GSA for a long time only to see my server being empty 99% of the time, a 32 players server that couldent even get up to 15 players since Gamespy already have 80+ servers with less then 200ppl on it.

Yesterdy when I open up my server on demo it took 10min and it was already at 20 players.

If you dont have anything to write except, OmG whY HosT oN deMo?! I suggest everyone keep their minds for themself and let whoever know reply.

Quote:I have been hosting on GSA for a long time only to see my server being empty 99% of the time

This is probably because rarely anyone plays the demo anymore...

[zunnie]

You are correct.

Anyhow I solved nr 1 and 3(3. not fully but). nr2 I will test and see what I can do about it.

I don't know about you, but I usually keep my mind inside my body. I don't know of anybody that has it outside on purpose.

1. You know what I mean.
2. You dident help.
3. Why do you even post here?
