I've gotten it to connect earlier today. Other people can still connect their bots but mine gets stuck. I've checked all my settings and even downloaded off brenbot.com to check it again, but nothing works...any ideas?

Win32 Brenbot.

Are you running mirc or other irc clients on the same computer ?  
Because n00bstories allows only 2 connections per ip :rolleyes:

Try to connect to one of this servers:

pIRC.n00bstories.com  
|-stats.n00bstories.com  
|-ownage.n00bstories.com  
|-irc.renstation.net  
|-home.n00bstories.com  
`-hub.n00bstories.com

RGBot nickname maybe already in use or a registered nickname.  
Change the bot nickname to something else

I'm having exactly the same problem, the config file is perfect, no one else is using the nickname, I registered it

I tried different servers but it doesn't connect to any server, also has full firewall access and when it's off it still doesn't connect....
