i have had no trouble with lag since i have had reguard, the text problem is not renguard but it is Core Patch 1, if you wish to change this text back to the normal one just download this which FMoxi made and the text will be back to normal.

Nightma12
lies, RenGuard does NOT make your renegade lag  :rolleyes:

if anything makes Renegade lag then its CP1, which is an optional install

I want screenshots of you playing with the FPS and KBPS and SFPS visible before you remove it, and then after you remove it.

And I also want a screenshot of your Task Manager showing the processes running. I wanna see how much RenGuard is impacting your system.
