Nice music 24/7 my mp3 hd is on shuffle there
You need winamp though. Best version ever: WinAmp v2.76 or get the crappy latest version at
http://www.winamp.com with all the useless extras on it etc.....

I happen to like 5.03. It's better than 2 or 3, IMO.

I got music from all sorts of genres dance, rap, soul, trance, club, hardcore, happy, and wtf more lol, its just on 'shuffle' so sometimes a song that sucks will come by

The server is streaming from holland so thats probably why your rebuffering all the time :S maybe your too far away from the server or something.
Servers upload is 100mbit.. soo.. there also a few renegade servres on it though but they aint taking up the full 100mbit ..

=)

I'm going to try to get a shoutcast server for my network, and I'll be DJing all the time. By then I'll have a couple thousand songs of nothing but the good ole Classic Rock.
