I don't know if this is the right forums to post this, but please can someone tell me wtf the 'LAN exploit' is? Sometimes if I am ingame, and I leave, right after I leave RenGuard restarts and it tells me the RenGuard pm and I hear the audio and yadada.. But when I return to my desktop it says

"You were note found in the server (I quit before it restarted)

Your attempt to use the LAN exploit will be filed and looked over" (or something close to that anyway :oops:)

Can someone tell me what that means? It's happened 3 times

Thanks!
