Subject: Renegade multiplayer isn't working!

I have two issues with Multiplayer:

1) I get disconnected after minute or two, either by lagging out (nothing responds for a short while and then I drop) or it seems fine and then I just get disconnected. I have the latest patch and RenGuard. In the Multiplayer options it says to add the port of the router (???). Which ports does Renegade use?

2) Where can I download custom maps like C&C_Fortress2k4?

Also, where can I change my game name?

1. Don't know

2. http://www.renmaps.com
http://www.unrules.com

3. Register a new name.

rm5248
3. Register a new name.

Huh? It certainly doesn't say anything about that in the FAQ or the Rules thread in this forum.

1. it could be your ISP i had a problem when like every 10-20 mins i would get lagged out (but only on some servers), try maybe a diferent server see if it's any better. what kind of internet connection do you have? speed?

2. um maybe http://fanmaps.net/downloads/renegade/maps/index.html it has that fortres one you wanted

3. start renegade, Multiplay Ineternet, Westwood Online, on the left side of that screan there is a verticle bar thing go to thet and select My Informatoin, on the bottom click Manage Accounts, then try add another name... if not then just select never registered. you will not get an email back so don't worry about it
