Ok, ive had several occasions when retards will force rg someone who clearly isnt cheating. Is thier a way i can unforce them so they can come back into the server? An Un-ForceRg or something? Thank you in advance.

Why?

everyone should be using RG

DaGrebXYes, i know, but if thier not cheating they should be able to play anyway.

if they are not cheating all the more reason to use Renguard.. so they wont be kicked in the future

if your not going to use the force RG function on the server why have RG running at all ?

Let's assume one of the server admins can't get Renguard to work on his PC, for whatever reason...

Majiin Vegetahe should get the problem fixed then should'nt he  
OK, then let's theoretically assume he's tried that.

SpoonyMajiin Vegetahe should get the problem fixed then should'nt he  
OK, then let's theoretically assume he's tried that.

Is it a software problem, connection problem, or "Renguard Team Hates Me" problem?

I don't know, that's the downside of talking theoretically. :rolleyes:

Ah, but there's different methods to each that might actually work. Just trying on your own for a little bit is not the same...

Even if they should be running RG, the correct way to go about this was to help them out instead of pointing it out or telling them they aren't going to tell them how.

That's just childish and stupid.

Sometimes I wish only BHS staff could reply to question threads like these... At least then you should get a helpful answer.

But we are too busy coding to provide support for every question in here, especially when 75% of them are covered in the FAQ.

I never said it had to be a quick response.

Any response other than what these people have given would be worth the wait I'm sure.
