Hi, I was going to upgrade my graphics card to a much better card!
My two choices are ATI Radeon X800XT, and Geforce 6800 Ultra, and I am willing to spend up to \$600 Canadian!

Please give me your comment about which one is better for more fps and better picture quality in games, (IF YOU CAN? PLEASE GIVE ME FEEDBACK ON RENEGADE, WHAT I MEAN IS WHICH GRAPHIC CARD WORKS BETTER AND HAS MORE FPS AND BETTER PICTURE QUALITY)

PLEASE BE SIMPLE AND CLEAN!
THX

I am loyal to Gforce and have a
<http://www.firingsquad.com/products/hwproduct.asp/1088?viewdesc=1> , but Radeon makes a good product too.

What you need to do is come research on your motherboard chipset and make sure what is better for it. You may find out one or the other is a better card, but your motherboard may have issues with compatibility.

I think nVIDIA won this round with Geforce 6... Although I've never seen the power of the X800XT before.

After reading many Product test, the best are:

PCI-Express= Asus Extreme AX 800 XT Platinum [ATI X800XT] (595Euro)

AGP= Gainward CoolFX Ultra 2600GS [GeForce 6800 Ultra] (855Euro)

These are the Number1 each Category. Price is in Euro, because I´m german.

Anyway, I´m loyal to AMD & Nvidia...

the only reason why geforce is better is because of drivers (and linux drivers)
