When you open RenGuard, wait for that webpage opens first before you click the Renegade" button.

You did update Renegade before you installed RenGuard, correct?

IRON-FARTWhen you open RenGuard, wait for that webpage opens first before you click the Renegade" button.

I just wait till my "Renegade" button is set to be clicked and click it. I dont wait for sh*t lol

Works for me

He is asking if you patched your renegade to the latest version first (1.037) before installing renguard...

If not then you need to do that first.

[View Forum Message](#) <> [Reply to Message](#)

It could be that you get disconnected from the RG network for some files

being corrupted. It would report this on the RG-screen though.

Delete all w3d and ddb files from your data dir.

Other than that, if you reinstalled, updated 1.037 and installed RG, it should work just fine.

Starting fresh is always a good last resort. With your situation, I say go for it.

Like you said yourself: It worked before. Just until recently something on your pc changed which prevents RenGuard from working properly. Check your antivirus / firewall program(s) that you maybe have and make sure that you allow it to connect to the internet and that nothing is blocking or containing it.

[View Forum Message](#) <> [Reply to Message](#)

How about using the English language.
What exactly happens? Rengaurd loads up, you can click "Renegade" to start Ren, Ren loads up fine, and then it says you're not using Rengaurd from within Renegade?

If so, check to see whether gayspy/All Seeing Eye/RenIP what-ever is passing the correct name to Renguard.

You can do this by checking the text in Renguard (before it loads Renegade) to make sure it says "Welcome 2000_years" (or your name). If it's different to what it says ingame then it'll think RG is off.

no i have not and dude it never tells me the name at that welcome screen it just says:

[20] Warning. No WOL Name found. Connecting to WOL will probably fail

[20] Trying to connect to server #1...Connected

[20] Secure link established.

[20] Welcome to RenGuard !

[20] To launch Renegade, please click 'Renegade'.

[View Forum Message](#) <> [Reply to Message](#)

sry again for double post but this is worth it

here goes

this is the prob: the rengaurd does not connect to the net work

This is sollution: uninstall all rene and rengaurd files. then delete wut ever is left in the rene file by dleting that file now reinstall all the rene files, update them, and then add no cd. then make sure to install rengaurd before adding skins, update it and then test if it does not work then u must not have the correct files in ur rene file so cheak them and that sould fix this prob

case closed

P.S. no do not leave ANY files of renegade in the renegade folder for it will screw RG up thx for all ur help

rengaurd is getting overloaded... too many people on it now..
what a shame hope they get new servers... don't need another service that has reliability of
westwood online...

Subject: Rengaurd gone to poo
Posted by [mac](#) on Wed, 23 Feb 2005 08:52:45 GMT
[View Forum Message](#) <> [Reply to Message](#)

It isn't overloaded. There are enough servers, but more would be nice in case one fails. If you
want that, you should donate.

Reinstalling RenGuard wouldn't do anything.

Dexodrill
[20] Warning. No WOL Name found. Connecting to WOL will probobly fail

Okay. You need to sign into WOL first. Locate the game2.exe and open it (it will open the game).
Connect to WOL with your WOL nick. Then close Renegade. Then open the game.exe as you
normally would. RG should recongize you. If you still have problems after this, I misunderstood
the problem.
