Cheating.

Or you just got out of a pkg game. But usually Cheating.

did u just tell him to cheat...

the best way to fix this is the reinstall renegade and delete what ever is left in your data folder, or do lots of crap only experienced ppl now.

Really the only way to get the zero bug is with edited DBS files by themself or in a .pkg file since they control those aspects of the game that the zero bug effects.

So yeah.. Delete all .pkg files and .dbs files and you should be good.

You might want to delete anything named always3.dat too

What the hell? The zero bug was around LONG before things such as FR.

Don't be so fucking presumptious.

Id guess that 99% of the zero bug is cheating. And yes i mean the dbs edits.

OblivionId guess that 99% of the zero bug is cheating. And yes i mean the dbs edits.

99% huh? Sooo... Renegade bugs are cheating now? As already said in this thread, it was around when Renegade first came out, when there was absolutly no cheats :rolleyes:

Absolutly no cheats!>!>!>!> that was the first thing i learned how to do. And i have never gotten the bug unless i was doing something i shouldnt.

EDIT: And yeah 99% is an overshot, but if you say like 80% it makes it sound much less than the percentage depicts.

I always get that the next game i play with a modded objects.ddb(and some other file).

Funny though, first your uber ownage with your home made jumpjet unlimited ammo 1 hit kill godlike speed havoc, next you can't even damage a thing

Edit: No n00bs i never cheated in MP unless someone asked for it.

i know the 0 bug!
usually it comes after you playing a simple mod (.pkg file)... only thing you can do is restart renegade...
but why these mods causes the 0 bug! is there no solution?
is this an error from the pkg. files? what is the error exactly?
probably this error can´t be fixed, but i hope not so...
it would be great if the cp2 fixes the 0 bug causes by playing a simple mod (.pkg file)...

maybe a solution is, to put all maps from the .pkg file in the normal map form (.mix file)??? let me know!
