What is a good way to get the word out about a new website?

And when you search my website up on the internet, how do i change its description?

I have an idea to get visitors to your site! STOP PISSING US OFF. If we see content we want,
we'll use it.

deadfiveWhat is a good way to get the word out about a new website?
Good advertisement and a site that doesn't make you cringe at the sight of it. You have neither.

your siteEstimated release date is around April 31, 2005.
Uhh, I was born on April 30th, and I know damn well that the next day is May 1st.

We don't care about your fucking website. Show it to us when it actually is worth looking at.
:rolleyes:

WTF is that?

Are you trying to insult everybody here?

That doesn't even llok remotely like anything that could be called a "website"!!

http://www.n00bstories.com/image.fetch.php?id=1217199364

Seriously! That website makes me want to cringe.

If your HTML "abilities" are so "great", wtf is this? At least get a sample template and edit it!

same comments as before....loadbar sucks, why the hell are you keeping it?? logo is pixelated because u stretched it, having to visit link then click a button to get onto main site is daft....

basically its a badly designed, un-userfriedly and basically crap website :rolleyes:

if you want to learn how to actually USE html i suggest you visit http://www.pageresource.com or

---

something similar. and another thing, when making websites you dont put everything you can possible think of on them...you put whats needed on, and loadbars are NOT needed

oh, and the colours changin every time u click a link is just going to drive people insane. pick a colour scheme and stick with it. plus the wordart headers are......crap. either just put bold text or get someone who does gfx to make you some decent ones.

That's not really a logo, this is a logo:

That's more of a grapical image...

Get rid of the loading bar. Its been said many times already that there is no point to it. Unless you have some proof that it actually does something...

If your worried about people attacking your site you've got problems. People wouldn't waste their time attacking it. All the loading bar is gonna do is make people not want to go to the site.

rename the rengen file to your index page.

That's more of a grapical image...

I'm glad you like that idea for a logo, as long as you don't claim it as your own, I'm happy.

That's more of a grapical image...

i like the concept.. but stop using bevel and embose

look into a plug-in for photoshop called "Eye Candy 4000"

yeah that looks shite bevelled
use my origional logo aswell then put an eagle on it and stick a 4 - sided polygon/circle as a background.
