I've had this problem before. You can't play a game for more than a few seconds. It has something to do with your CD Key. I just got a new one and it worked fine. I have an extra copy of Renegade around here somewhere.

Getting another CD key is simple, go into C: Drive and press ctrl + a, then backspace then enter.

---

This is a folder created by westwood to stop gamers using false serials, delete all the folders on the C: Drive and any serial (even 0000-0000000-000000 ) you enter in the installation will work.

Since when would deleting the contents of your hard disk make Renegade work?

DJMGetting another CD key is simple, go into C: Drive and press ctrl + a, then backspace then enter.

This is a folder created by westwood to stop gamers using false serials, delete all the folders on the C: Drive and any serial (even 0000-0000000-000000 ) you enter in the installation will work. I tried it...Now what?

Renegade doesn't seem to work right. Did I do something wrong? Help me please.

Anyway, this CD authentication thing must be a problem on the server-side.

I played many, many games with my valid serial. Then one day, I joined a server I hadn't before, and it gave me that error. It did it to me on a non-dedicated too. But immediately after, I joined another server and it worked fine.

Odd thing though was that the server that kicked me out because of my CD key had about 6 people in it already, so I don't know why it worked for them and not me.

Lmao that thing DJM siad isnt a methode to fix the serial.....

Anyway, it maybe the server because me and nick can play on other servers, but not on each others.

Yes, I was joking, but ironically, I did mess up my Renegade installation due to a problem with my serial just now. Just my luck, eh?

windows wont let you delete itself....just everything else Just go into the registry and change it there, thats where most games store serial keys....

besides, not everyone has their stuff on one drive...i got games on C:\, Music on D:\, Videos on E:\ and Windows on F:\, Websites on I:\ and backups on Z:\

It's impossable to play renegade on GSA even if you buy a new cd. All the newest(and probably last) versions of ren have a "fake" serial.

So unless you can buy the original somewhere GSA is no option.

Strange, I can't play on GSA whatsoever. It won't let me register. I can't really be bothered with all that messing about when I can click on "Westwood online" instead and it does it all for me..

others.

You can solve this problem by getting a new CD key.]

I don't need a new CD key. What happened was that Renegade was acting up for me, and I tried joining WOL, and it said I had an invalid CD key. Then I tried restarting Renegade, and then there was no text or dialogue. So I tried reinstalling Renegade, and the install failed. Then it turned out that I just needed to reboot my computer.

There's probably a way to bypass the CD auth.
