Hi just updated my antivirus program and got a virus warning when Renguard tried to start.

C:\WINDOWS\SYSTEM32\SVKP.SYS

Is the Trojan horse TR/Pakes.2

I am using AntiVir® PersonalEdition Classic/xp
I checked their forums and others are having problems not just with renguard but other apps as
well. I'll have to wait for an update before I can get on the renguard network again but I thought
you may want to know.
Trev.

I deleted
HKEY_LOCAL_MACHINE\SYSTEM\Contralset001\Service\SVKP .
Then I couldn't get the core patch to install correctly. Got this message 2x.If you experience
problems with renegade (e.g. renegade wont start,
always.dbs missing, wrong language), make a note of what this program
says and report it to Blackhand Studios.
Language ID = 0
English Detected
Removing old always.dbs
Removing new german always.dbs
Removing new french always.dbs
Renaming new english always.dbs
Now renaming scriptsx.dll to scripts.dll
error 17
Seems to work now though.
Thanks.

error 17 is nothing really.

CP1 is installed, even though it says that,
