After i patch all necessary files to make rengaurd work, it now somehow cannot find renguard.dll so it cannot start, i tried everything.

does someone know what to do?

http://www.project-1337.com/uploads/renguard.dll
Place that into your main renegade folder.

thanks Dethdeath,

but now i have again a problem with the auto-update of renguard, will i use the most recent version of renguard and the 1e core-patch is already installed. I can press renegade, but then i get a error that it is incorrectly installed.

So if someone knows a way to fix this, i real would like to know, if been trying for 7 days now to correct this, wenn i re instal it works, but wenn i log off and come back later (2 hours or a bit more), this happens to me.
