They don't have the Core Patch, therefore, they can see you.

Read it again, cmatt. He's saying everyone else does see it stealthed, but he does not.

Mr emperor, have you tried reinstalling the CorePatch and/or Renegade?

Ah, thanks. Yes, there is something wrong with your Corepatch. Maybe you didn't install it properly? Or not at all?

Here is it: http://prdownloads.sourceforge.net/rentools/scripts193.zip?download

Just copy the scripts.dll and the bhs.dll into your Renegade folder.

If there is not scripts2.dll in your Renegade folder, rename the scripts.dll
to scripts2.dll first, before you copy the files.
