I used to play renegade a few months ago, but i had to uninstall it. But now when i try to re-install it, it freezes at 26% everytime. it gets to 26% with no problems, but it stops, and after a while it says " make sure the renegade disk is in the cd drive."
is my installation disk just broken?

Well if you can somehow see if it will install on another machine, we will know where to turn next in solving your problem.
