Have you tampered/editted these script.dlls? Or whoever you got it from because that could be the reason:\

The bot he refers to is a straight rip-and-rename.

The original bot is called Chaotic Fusion Guard. I know this because I helped work on CFGuard, and worked with its creators, (Mainly Quadra00). Parts of the code were done by me, and they match perfectly with the development copy I have on my PC.

The bot was released for public use, but nopic has gone and re-named all the files etc. to try and pass it up as his own work. This is unacceptable.

nopic, either use the real copy, which bears the name CFGuard, or do not use it at all. Your other option is to grow a pair and write your own bot, but im guessing you don't have it in ya, considering your here asking for help.

Now shoo. Shoo!

well really the original bot was made my ssptweek it was called NGSGuard. quadra00 than went and made a copy that did not have as many bugs in it.

Yes, thats true, but the copy of NGSGuard was released free and incomplete, and tweek gave permission and even helped get CFGuard going, so it wasn't a rip. We actually had to write our own code. What nopic did is just blatant rip-and-rename.

How dare you rip of technology from either bot. NGSGuard was made by ssptweek. CFGuard was combined by me. The coding in the bot is similar but CFGuard was modified with many addons that Light helped placed in. Revival fixed a few bugs as well and helped give ideas to the bot.

I dont appreciate idiots using a bot and calling it their own. Do you even know how to IRC script? Do you even know crap at all? And I quite remember you Nopic, your the idiot who tried to evade RenGuard but was banned by it.

Oh and nice .ini file... I bet you dont know how you did that...

first off i cant belive you ppl dont eve think about asking me about it
yes i did edit cfguard ok
but i also added about 5 new commands

---

i got the !setjoin working
i also added forcerg and forcetc
and !monkey !pig and !chicken

ill be adding credit to quadra etc
tha was only a beta to c if the edit worked
then i was gonna set up everything else
i will be adding more and i wil add a !creators command
you will be added

btw who eva hacked my site   i have you ip

I have no idea who hacked your site, nor do I care.

Quote:first off i cant belive you ppl dont eve think about asking me about it

I can. We didnt even know you had ripped it until you posted here. I tried finding you in IRC, but you were never on. I had a chat with one of your admin though. They didn't seem surprised you had stolen it.

Quote: yes i did edit cfguard ok
but i also added about 5 new commands
i got the !setjoin working
i also added forcerg and forcetc
and !monkey !pig and !chicken

Wow, !setjoin is like a 10 minute job, besides, my untampered version works, you must have broken it yourself. !forcerg is easy to do, same for your kiddie commands too.

Quote:tha was only a beta to c if the edit worked

i will be adding more and i wil add a !creators command
you will be added

Your bot ID'ed itself as:
|04:59:47pm| --> NOTICE: From [nsbot2 (nsbot@n00b-F8D573B9.nmusd.k12.ca.us)] : night stalkers bot Version 1.0 made by nopic01
|04:59:47pm| --> NOTICE: From [nsbot2 (nsbot@n00b-F8D573B9.nmusd.k12.ca.us)] : nsbot is free to download for a copy ask nopic01 on the website

That doesnt say Beta for a start. Your just blatantly taking credit for it, and now you've been caught your trying to BS your way around it.

Give proper credit to ssptweek for NGSGuard, and Quadra00 for working on CFGuard. Don't make a !creators command, put CFGuard and NGSGuard into the !version command. Thats what it's there for.

Heres what it was before you over-wrote it:

```
elseif ($1 = !version) {
  .notice $nick  C haotic  F usion  G uard Version 1.4 combined by Quadra00
  .notice $nick CFGuard is a combination of NGSGuard, CloudyServ and OPMGuard.
}
```

You can see it gived FULL credit to NGSGuard, CS and OPMGuard. You should do the same.

I don't think you added any commands on your own simply because you couldn't even get the crates to work. All you needed was the correct gimmeurDATAS.dat with the crate coordinations.Also your use of language is horrible. By the looks of it I don't think you know the slightest thing about mIRC.

Your still taking credit for a bot you didn't create.
Your !version command still says you made it, and the !creators command (which is your way of trying to get out of this) doesn't even exist.
You have lied every step of the way. The only upside is that your too dumb to use the bot correctly.

I'm not really sure what this topic is supposed to be about, but it clearly has deviated from the original subject.
