   The Server runs on a private connection with CP1 Server Side, Half Renguard etc. 1.8 mbit connection 1 gig Ram AMD Athlon 64.

   If you would like to be an admin on my server please PM me with a FDS Serial and your WOL UserName so i can add you to the admin List.

   You will recieve full privalages including kick,ban,!unforcerg etc..Mods and admins on my server are NOT required to run renguard.

   The server map rotation is also chosen by the mods and admins, and can be voted by players(at the forums on my webserver)If you have any questions or comments/suggestions, please PM me.

Of course, if they don't run RenGuard, a lot of their Moderation powers which relate to RenGuard will be null and void. But hey. Their choice.

Now your gettin it! So if there is anyone who can give me an fds key, they will be a mod on my server, but note, if you choose to NOT use rg, some of your commands will be void, and if i get word in the forums that a mod is cheating or hacking, you will loose all mod powers, any takers?

Nopic, I emailed you about an fds and you didnt reply, if sum1 logs in with a mod name, i can see ip address and mac address header etc. so there is no need to worry, if sum1 logs into server with a mod name, and cheats, they will be banned, just plz, is ne1 going to give me an fds or no, because im really tryin here, i really wanna get my server up and running and no1 wants to give me an fds serial, ive even offered to let them become mod/admin if the give serial.i guess my attempts were in vein, oh well, i may as well give up, and even if the person who gives fds is cought cheating,they will be kicked and even banned, just because they provided serial,doesnt mean they are allowed to cheat, its unfair to other players,and i believe you agree, so if ne1 would like to become mod or admin, pm me or email with fds and your westwood name and ill put you on mod/admin list.
