I just noticed it's been quite a while since we've shown our desktops.

Here's mine:

Yea, fool me once; shame on you. Fool me twice, shame on me. However, you should know that I bought Madden every year prior to this one. Not anymore, I'll just wait for Blitz: The League.

Btw, Xeon where did you get that theme, I like it.

Close...Actually I just went crazy with the gradient tool then added the color using the hue and saturation tool. After that I added 2 movie prime lens flares and deleted the actual flare. Added the text, copied the layer, blurred the bottom text. Boom, done. Extremely simple. LOL.  
Nooooooooooooo you caught me!

That's an incredibly retarded way to get rid of icons. Are you stupid? You just remove them from the desktop, not crash Explorer. You go along stuck in your little useless Windows "secrets".

I agree with IceDog, keep your little Windows secrets to yourself.

Edit: Whoops! Excuse me, i have to take a picture of my Desktop...

Yes, ive changed my Windows Theme once again. I can read things with this color configuration, and ive yet to find any Warcraft Orc icons to use.

Or even easier,

Start  
:-Run

C:\Documents and Settings\%USERNAME%\Local Settings\Application Data\Microsoft\

Enter

and it will be stored as "Wallpaper1.bmp"

Well thats for XP anyway.
