Most of us have all realized that virus's do suck and have invested in good antivirus programs.

If you manage to catch a virus quick deleting it also helps

Things to do:
- Buy AntiVirus Software
- Learn how to catch and stop virus's(I've caught and deleted about 5 so far on my machine in a few months)
- MAKE BACKUPS FREQUENTLY!

If you manage to do those virus's won't be a problem.

Oh ya and its always a good idea to only download trusted files...

That may be why your computer died... AVG isn't good at all compared to NOD32. Although AVG is free, NOD32 caught A LOT that AVG missed in my experience.

NOD32? heard of it but never got my attention how much does it cost?

And sorry csskiller i dont go to pron sites.   funny sh*t to pervs suck all they do is look at girls they have no "fun" like videogames perhaps

I format my Windows partition on my HDD and reinstall on a regular basis. Beats paying for a antivirus scanner anyday. =o

Norton Anti-virus Corporate Edition is the ultimate way to go. No, I did not download it, I have it legally.

Norton Internet Security 2004 Professional came with my computer. The only good thing about it is the anti-virus. Use Sygate for your firewall.

Mine doesn't have firewall, it's corporate. I don't even need a firewall, I have a router.

I have 4 comps hooked up to a lynksys wireless thing..

Mine doesn't have firewall, it's corporate. I don't even need a firewall, I have a router.

A router doesn't check outgoing traffic a Software firewall does.

A router is a good way to protect against/most worms/trojans. But then again if you download a file with a botnet in it your router probably wont do shit.

If you want to be 100% safe get both.

Nod32 is fairly good scanner seeing that it is light, and it catches most virusses. AVG isn't that good besides that it's free. Norton I wouldn't even consider that crap.

Also UPDAting windows reguarly is a important thing people seem to forget.

I know how to protect my computer, sorry.

My router has a built in firewall. I know what I am talking about.
