Here is one minute video of crazy Driving.  
In Bink video format.

What is the deal with this? How on earth did they manage it. I loved Driver but I don't remember ever going that fast. O\_O

Remember, if you complete the game successfully, you can use various built-in cheats such as super fast cars. The Thunderbird car goes over 200 MPH with with code. When it goes fast enough, most of the sounds mute out and the car almost flies.

So what is actually different?

- \* New collision sounds.
  - \* New cop siren sounds.
  - \* The original V8 engine sound was replaced with a recording of a Ford Sierra engine
-
