Hi,

Yesterday while playing Renegade my norton anti virus popped up and warned me of a Trojan virus called Hacktool.Rootkit. Since I exited out of Renegade the virus must have taken over RenGaurd and now I can no longer use RenGaurd?!?! I've un-installed and re-installed Rengaurd but to no avail, I had the virus in quarantine and restored it but still it hasn't fixed the problem... I'm at a loss at what else I can do?? any help and suggestions would be hugely appreciated.

Thanks,

Nic.

Plz check the renguard-client forum: there are already two topics about it there .

It's a false positive by Norton antivirus.
