I use Windows 2000, as you all know, normal work of RenGuard on my OS is a miracle. For some unknown reason, RenGuard worked now. I, as usual, connected the server and received this. I use standart game.exe which is created by RenGuard installation. but this stupid program thinks that ITS OWN GAME.EXE IS A CHEATER ONE!

I'm shocked... I hope this bastard didn't ban me for nothing =)

I'm sorry for that

it is written here:

WTF??? I'm not a cheater!

This thing has more glitches than Windows 95!

It is a miracle to make it work on Win2000, and it gives me this!

Burn!!!

I was a little bit angry while writing so don't pay so much attention to it please =).

I connected the server and heard some strange voice and then RG gave me a message that my game.exe was broken and I was kicked for cheating %)
