ok heres what massage i get when i try and use the patch 1.037 which allows to play the game without the cd.

This program cannont update the installed version of Renegade 1.037 becuase of the follwing reason:
C\WestWood\Renegade\game.exe:unknown version.

i dont really now how i can fix it can anyone help

I foudn the this porblem fixed it and downloaded the no cd patch but now when i open game.exe to run the game i get the error massage titled "Invalid working file" and it says set working folder and try again...

i know why it says it but i do not know where the files have to be in order to work can anyone tell me what file is suppose to be in each folder or show a picture?

He is actually trying to update. Hmm, put the no-cd crack in it (of 1.037) then install the patch. I've reinstalled it for a friend, but accidently replaced the 1.0 exe with the no-cd of 1.037, and yet the update still worked.

Hey
Have you ever got a pic or something to tell witch order the files go in?
I been trying to get my rengade game to work but 2 reasons why is isnt working 1 its keep going
to Invalid working folder (set working folder and try again) and 2 my CD is scratched up and I can
redownload it...
lol.

but please when ever you get the file order that it goes in please tell me!!!
