The screenshot shows a Windows desktop environment. In the background, a Notepad window titled "svrcfg_cnc.ini - Notepad" is open, displaying the following text:

```

In the foreground, the "Blaze Regulator Version 1.50.1529.23836" application window is open. It features a "Server Events" tab and a "BR Config" sub-tab. The "Server Settings" section includes fields for "Current Config" (Default), "GameType" (WOL), "WOL Server" (USA), "NickName" (a0000), "Password", "Serial" (252555271135456759), "Allow Remote Admin" (checked), "Remote Admin Pass" (58), "Remote Admin Port" (5000), "Remote Admin IP", "Net Update Rate" (5), and "Bandwidth Up" (7). The "Time Limit", "Max Players", "Starting Credits", "Radar Mode", "Passworded", and "Password" sections are also visible. A "Maps" section contains "Move Up", "Move Down", "Remove", and "Add" buttons. At the bottom, there are "Save Settings" and "Save Current Game Config" buttons.

An error dialog box is overlaid on the application window, titled "Blaze Regulator Version 1.50.1529.23836". It contains the following text:

An unhandled exception has occurred in your application. If you click Continue, the application will ignore this error and attempt to continue. If you click Quit, the application will be shut down immediately.

The given path's format is not supported.

The dialog box has "Details", "Continue", and "Quit" buttons.

The Windows taskbar at the bottom shows the Start button and several open applications: "Renegade P...", "BlazeRegula...", "ReadMe.txt ...", "data", "svrcfg_cnc.i...", and "Blaze Reg...".

- 1) Do you actually have the RenegadeFDS Installed?
 - 2) Click on the Br Config Tab
 - 3) Post a screenshot, from the error msg your path in there is invalid so i'm guessing you left it as /!!!
 - 4) Change the path above.

Still have BRenBot?

Read the BRenBot guide on www.brenbot.com (there is a link somewhere).

We need Aircraftkiller to give this kid some spelling lesson's too
