lol well im having some trouble with a script and i need mirc when i open to skip that damm
window that tell you to register.
and when u type /exit for it to skip the "are you sure you want to exit" window....

I have the serial and name for IRC but when i go to reg on mirc.com it ask for you to pay i
remember u didnt have too.

Well i just finally registered it and now when i type /exit it pops up that "comfirm exit"
window...How would i take this off

Open up options(Alt + O), then go to Other and click on Confirm... , you should now get a window
with the top options being:

Just leave everything open there.
