I currently have Brenbot 131 for my RenAlert server. But it will not work fully correctly. Could anyone supply me with a link to where i could download the proper RenAlert version of Brenbot.

Thanks for you time.

we've talked about this, and there is no "proper" version, you can make the 1.41 work if you configure it correctly

Packhunter is currently working on BR since he took it over from Mac and is doing good work. I don't see why ACK couldn't team up with him to get a Red Alert version of BR.

Yeah, why not, since it already kinda works. But BrenBot 1.43 must be released first. After that, I might want to look into RenAlert.

Would you have an expected time on when the NR bot will be completed?
