I was playing on ren archive server and there was a cheater...  
They don't even know who it is and then after some games they ban me because i pwn... So ren guard is still useless because they don't even know who is cheating...

O and no i didn't install the client from ren guard i don't need third party crap.

I understand being banned pisses you off. Don't blame this on renguard though. Without renguard cheaters would be roaming free. And although you have every right not to run 'third party crap', if there is cheating going on or you get a few lucky shots chances are you are going to get kicked or banned a lot sooner then if you would be running this 'third party crap'. So do yourself a favor and install renguard or stop complaining.

It's your own fault for not having RenGuard. Chances are, a cheater will not be running RenGuard. So you made yourself a prime target for bans. Your options are simple:

- 1) Run the risk of getting banned
- 2) Get RenGuard
- 3) Don't play

For you, I recommend #3.

There is nothing to be lost through running Renguard. It does not slow down your game, it will not haxx0r your computer, and it is not a program that allows people to snoop through your hard drive. The only thing you could possibly lose is the frustration from being banned all the damn time.

Choose it or shove it, but don't complain about it. You won't get any sympathy here.

Go to [www.ren-archive.com](http://www.ren-archive.com) if you'd like to protest the ban.. I know a lot of the mods there, and most of the time they won't ban you without giving you a test unless they see you blatantly cheating. You probably got banned for racism or something along those lines... I have seen one of them going on a ban rampage once, but other than that their bans are usually fair.

If you can't find the forums(lol), then you can just go here: <http://forum.ren-archive.com/>

Edit:

What sort of test?

They pmed me that i should post a screenshot or something but then a few maps later they banned me...

If they would allow guest posts i might had posted some pictures but there is nothing to see. Or they would ban me for a custom crosshair

But i guess they rather have players join where they can win from... Since most players in that server were to lazy to repair.

Why would you be banned for a custom crosshair? Yes someone asked you for a screenshot, why didn't you post it if you took one..? It doesn't take that long to make an account. And of course they will give you time to post the screenshot before they ban you... =\  
You fail to post the screenshot and then complain about being banned? I would understand your case if you were banned out of nowhere for no reason, but you were asked for a specific screenshot and did not post it.

Been a long time since i posted on here...probably no one knows me.

Anyways, Demo wasnt cheating at all...me and our other friend just kept saying demo cheated. There was a cheater in there, but for fun we pointed it on him coz we had no clue who it was. Hence his claims that rengaurd is useless.

So its kinda funny how 2 people just say someone is cheating coz they play good and then he gets banned...i had a good laugh

If you can't be bothered to switch to windows and take a screenshot, then why make a topic about it complaining about your ban? I'm not saying you were or were not cheating, your refusal to post a screenshot totally warrants your ban.

And why would people think that screenshot looks like you are cheating? That's just a glitch.. o.O

So, you were banned from Ren-archive, then come to Renegadeforums.com to complain about your ban?

In addition, you weren't running Renguard, then complain you were banned?

When you used to play, I bet there weren't any cheats... No one was banned back then. Players are banned now because all thats on everyones mind after they get killed is that someone is cheating. It's Renegade, if you don't want to have to worry bout being accused of cheating then run Renguard, get your own server, or play somewhere where you are known as a player.

So friends who make fun with you from time to time are bad friends?

Well let me rephrase it like someone did in this topic.  
There are 2 options:

- 1) You have no life outside your computer, try to turn off your computer and discover the world of friends, and a life without a computer.
- 2) You have no friends and have no idea what it's like

Basicly you have one option.

Btw I'm the one who called him a cheater the first time

Generally, if multiple players single out someone as a cheater, a halfway decent mod or admin will take it seriously. A human being can't always determine whether or not something is true by him/herself, so part of the responsibility lies on the players of the game.

Most likely a pic of you looking at the enemy to see if you have a big head. Maybe while holding your pistol with 6 rounds in the magazine.

I don't understand why you bash Renguard. I use it 100% of the time and have no problem with it being third party software. I also use a third party web browser, anti-virus, firewall, video card driver, and several media players. Image viewer, KBD driver, ps2 driver, extraction utility, port sniffer, text to speech program. I also have some third party spyware, adware and some tracker cookies for dessert.

You must not remember when cheating was so bad you couldn't play a 30 minute game without someone fucking it up in a matter of seconds. It got so bad I uninstalled Renegade and quit playing for over a year. Someone tried telling me about Renguard, but I would throw the blanket statement over it and never even gave it a chance. I was finally convinced to try it, been playing since Feb of 2005 with it on all the time. Even if it says im not. Yeah, it's not perfect but neither are you.

I thought you were always whining about how Renegade sucks and you never play it anyway, heh.

Crazy Dutch.
