Hi On my server I have as a secret vehicle the recon bike.

I was wondering if someone can tell me whether it is possible and if so how do you change the speed it reloads as and increase the shields.

I have changed the shield & health setting for the bike, but only the health worked. In turns of reload, I have tried changing that on the recons weapons but it has no effect.

Any help thanks
buffymaniack

On the recon bikes preset go mod, then on the settings tab. All the stuff with physics is there.

For the weaopn i think its in the weapons folder under something related with recon bike, do the same thing. Mod, then settings tab on the window that pops up.

Well changing a vecs weapon on serverside does not really work :{.

Changing vec health does..But the vec will look like it has full health until it actually moves under the original amount of maxhealth.
