Hullo,

I am making a Modded map for renegade, and i want to change the team names, so how would i go about doing this? do i do it in commando level edit or what?

thanks for the help

From what I know it's done with the strings.tdb file. You can edit it inside LevelEdit, but you can't use it for a map, only for your client or a mod. I know no other ways to edit the names of the teams so from what I know you are unable to edit the names.

i know hwo to edit the strings.tdb and how to remove it from the map and install it for the client, its just i dont know where abouts in there in the strings.tdb is the team names, so if some one can a the lines its on, so i can look for that line, then ill beable to do it, cause ive searched threw it all, and relaced the names nod and gdi, every where, where i have seen them, but its not working. so maybe ive missed something. so can someone please explain, where it is. thanks.

the strings.tdb contains ANY written word

what 'GDI' and 'Nod' do you want to change exactly?

i want it to change the Ingame team names to Axis and Allies (so when ur ingame it will say axis

---

and allies instead of Nod/Gdi), Its for the Axis and Allies mod a friend of mine and i are making. but i just havnt a bit of trouble finding the team names.

Just go through the Strings.TDB and change "GDI" and "Nod" just as long untill you find the right ones.

editing the strings with wordpad might fuck it up
LevelEdit makes it easier and doesnt kill that file

You just said you where making a modded map, how the hell can you make one without LevelEdit? If you have LevelEdit follow this tutorial to edit the strings.tdb with it.

Nismo != seraphim..

I've tried to edit the strings myself using a hex editor to no avail as well.. I have no clue why it doesn't work.. I'll go try LE now, I didn't know you could do it with that.

That means that you aren't the same guy as seraphim.. lol
I got it to work perfectly too. Thanks Ma1!
