I'm sure there has already been a post about this, but I don't have the time to look it up right now sorry

Well I start Renegade as usual and all the sudden I get an error saying that my always.dbs is corrupted (Screen Shot Below) I Tried deleting it then reinstalling from the disk but the same error occurred. Any info on how to fix this would be appreciated. Thanks.

The screenshot shows the RenGuard 1.03 software interface. At the top, there is a banner for 'COMMAND & CONQUER: RENEGADE' with the tagline 'Experience C&C from a whole new perspective.' Below the banner, on the left, is a sidebar with links: 'Community MOTD', 'Server List', 'Beginner's Guide', 'Help', 'About RenGuard', 'RenGuard.com', and 'Support Chat'. In the center, there is a 'Top 5 Servers for GameSpy and Westwood Online' table:

GSA	WOL
Brenbot 1.43 test server	1/10
*SOS*Dying Grounds AOW	0/20
UCGAMING	0/8
-=MementoMori=- - 4 years	0/24
www.AUGELITE.com[SnIpEr]	0/24
(Player counts shown are RenGuard-verified players. Actual counts may vary.)	

Below the table, there is a 'Current News' section with the following log entries:

- [11:31] Welcome to RenGuard, Kioshin18!
- [11:31] To launch Renegade, please click 'Renegade'.
- [11:31] WARNING: Model Textures (Skins) have been detected on your client! You will not be able to join a pure server.
- [11:31] Bad/Corrupted file data\always.dbs has been found in your renegade directory
- [11:31] Disconnected from RenGuard network

At the bottom of the interface, there are buttons for 'Renegade', 'Options', and 'Quit', and a status bar that says 'RenGuard 1.03 - 662 user(s) on 82 server(s)'.

He said his always.dbs is corrupted not his always.dat.

They are also on game maps site try download one of these:

always.dbs (english version)

always.dbs (german version)
