I formatted my pc yesterday, then installed renegade, then the 1.037 patch. But when i try to install the rg 1.03 setup, nothing happened. So i decided to format the pc again to fix it, but the same thing happened again. Any ideas?

There is a post about manually installing renguard, somewhere on the forum *hopes someone can point it to help our friend out*

Seems to me the install is corrupt :-s. Did you download it brand new from www.renguard.com?

Yes I did twice but it's still the same

I downloaded it again while typing the sentence above, now it's working, thank you so much. It's your luck I think
