Hy

At first i should say, i come from austria, my english is not the best [speaking german] ^^

I installed Renguard and tried to download the core patch with auto update. it works for the next 99% [or so]. The line was full. But suddenly it was down. I could click and click but nothing happened.

So i downloaded today CP2 from <http://download.renguard.com/cp2/patchall.zip>
I executed ZIP and put the File into my Renegade Folder, but when I started Renegade it said, that it wants to install the latest Core Patch. I tried to find something to open the PATCHALL.RTP File, but i didn't find anything.

!! PLEASE HELP ME !!

(Maybe I won't come here so fast as an answer comes, so please mail me to Duke_Devlin@gmx.at)

MFG

Duke

P.S.: I don't know if I have CP1, when I go into my favourite Server [A000RFL3 - RFL Clan.net Maratho CP1] it says, that i haven't got CP1.

Download <http://download.renguard.com/cp2/patcher.zip> and unzip into the renegade folder along with that patchall.rtp file.

Then run the exe file inside patcher.zip

It worked very well =)

Thank you very much

MFG
