I made a tank. I want the camera to be inside the tank. Is it possible, and how?

I dont think there is a way to do it in LE. I think you might have to go into Always.dat and edit Cameras.ini.

well is there perhaps a bone to the tank itself I can add?

You know like the origin bone, maybe there is a bone something like the camera bone.

You know like the origin bone, maybe there is a bone something like the camera bone.

Great Maps, I like the previews, I will eventually dowload them.
If you can, can you also include bots????

Bots are cool, fun and very usefull.

That many thumbs up!

P.S.: I am a big fan of maps.

Modified cameras.ini can be used in PKG's
They can also be added to the data folder as a replacement for Renegade's default settings,
however this is blocked by Renguard.

Im glad you like my maps. It would be kind of hard to add bots to the maps now...   However in
future maps I'll add bots as a separate download. This map I'm working on now blows anything
I've done before out of the water. I just really need Acks trees or trees like that and need to mod
the stupid cameras.ini thingy.
