HOLY CRAP 1 GIG!!!

THINK IF YOU DID DUAL WITH 2 OF THOSE 2 GIGS OF VIDEONESS!

Renegade would run with 1000 FPS lol!

You know that the video RAM means nothing if you don't have a good GPU clock, right?

that is 512 megs per core. there is plenty of clock per core to fill up 512 megs of ram.

Not quite true, as it isn't DirectX 10 "ready".

I've been considering getting one or two of these, but I was thinking about it recently. Wouldnt it make more sense to have 4 PCI E slots and four cards? The way it is, two cards have to go through one PCI-E Slot. Is there any sort of bottlenecking there or does the PCI-E allow for enough bandwidth for both cards?

I'm just saying it's two cores, not two cards.
