Ok- I felt like messin' around and making some drop mods. So i make some make my game- buy a vehicle and a cargo plane doesnt come- yes the script is right i have the animation for the cargo plane and created the cargo plane but it doesnt come and a vehicle doesnt appear ANYWHERE on the map. I also have no pistol or c4. Is this because of a map I downloaded?

Please show a picture of your drop off mod and a picture of all the files in your Renegade data folder (Then I may be able to provide some help).
