Tell me your problem and I will be more then willing to help you. By the way, coming here bitching about something with CAPS on isn't going to help you at all.

Did he just say that he'd like cheats if you have them, and he doesn't cheat because he doesn't have any cheats?

By your topic title I would assume you have a problem with your TFD disk, but your post seems unrelated to the topic title.. did you change your mind about what you were going to post, or are you just a raving lunatic who can't use a caps lock key?

As for what he said.. tbh I have no idea, but the general gist seems to be he can't get renguard to work for one reason or another.

And there is at least one topic about installing RenGuard with TFD.

Oh, and as far as I can make out, he wants cheat codes, not specifically cheats. Of course, there are no real cheat codes if you discount registry edits, "edit_vehicle" and "extras".

is "extras" a cheat? (like you can win the game with a sedan)

(and this is general discussion, not technical help)

Hmm.. let me see if I can decipher this.

He doesn't cheat, but wants cheats if people have them.

He can't download Renguard, but is able to access these forums.

He's been asking for help, so in the past two years he's been asking, he has not learned how to play the game, and despite all this help he's inquired about, he has a total post count of... 1

My apologies. Usually introductory phrases like that don't contain any of the actual detail.

(Yes, I know what you're getting at, and no, this isn't intended as an argumentative statement)

OMGWTFBBQ?

<CtrlAltDestroy> Alright, so I was working at Steak n Shake today

<CtrlAltDestroy> There was this new girl

<CtrlAltDestroy> For her break, she wanted a chili 5-way

<CtrlAltDestroy> So we told her to make it herself cuz we were busy

<CtrlAltDestroy> So she goes to make it

<CtrlAltDestroy> And like most n00bs do at least once, she mistook the barbecue sauce for the spaghetti sauce

<CtrlAltDestroy> So she poured barbecue sauce on her 5-way.

<CtrlAltDestroy> I was sitting next to her when she started to eat it...

<CtrlAltDestroy> When she took a bite, she screamed

<CtrlAltDestroy> "OH MY GOD, WHAT THE FUCK, BARBEQUE?"

Since renguard has screwed up so many instances of renegade, personally, i hate the living daylights out of it, but that's just my opinion.

It does suck, I let my freind keep my Renegade + Yuris Revenge In exchanged I got his first decade (As he tired to return it but they wouldnt give money back only exchange of copy). So I

install it and ever since then... Ive been getting nothing but problems. I only like it for it installs renegade like in 1 minute compared to my old 20min.
