The (hopefully, I think) final version of the original "day of remembrance" piece I made a few months ago. Let me know what you think, I'm really happy with how this turned out.

I like the amount of detail on the city intersection.

It looks really good. My only question is if the grainy texture is on purpose. It looks really good,

regardless.

Yes it's intentionally grainy, I ran the image through Photoshop to make it look as if it was captured by 800 ISO film.

Looks like plastic

Jk, it looks fairly good although it seems like the street lamp posts are a bit out of scale. Otherwise good focal point, nice billboard in the background, and nice contrast overall.

Only thing i dont really like is that meteors contrail, just doesnt seem to be hot enough

Either way a nice peice of work.

That's what I thought, but I wasn't sure. It's an awesome effect.
