Start > Control Pannel

A window will pop up, look for "Add or Remove Programs", when found, click it.

Wait for the list to be populated, as it will say, then scroll down till you see "RenGuard". Click on "RenGuard" and click "Change/Remove". Another window will pop up, select "Remove" then click "Next" towards the bottum right. If this doesn't work, go through the same process, but when you reach to where you click "Remove" click "Repair" instead.

dood wrote on Sat, 23 September 2006 22:29OMFG I WANNA PLAY IT FROM DA FRIGGAH TFD MENU!

- 1) Learn how to use the Caps Lock key, it's quite useful.
 - 2) The TFD menu is daft anyway, takes longer to get into a game as you have to load up a menu first
 - 3) If you can't spell a word either use the spell check function on this forum, or use dictionary.com to get the correct spelling.
 - 4) I simply suggested a quick way to play renegade, no need to get aggressive...
-

<http://www.renegadeforums.com/index.php?t=msg&th=19350&start=0&rid=735>

Everything would include that, and that works.

Careful how you uninstall it, doing it incorrectly can mess up your game and make you need to reinstall.

happened to me plenty of times..

You don't uninstall it by deleting game.exe.
