Hi all,

I have a question.

I have install cloudyserv and it works.
Only i want make me and a friend ingame admin.
How can i do that.
I have try it in irc with !add name 4
And then personal msg to the bot: !setpw player password

but then when i'm in game he said password is not set.

How can that?

Can somebody help me.

Yours,
RidoYugo

You "can" add a admin By the config files in your CloudyServ folder.. but usually "!add (player nick) (access Level)" works as well, Did you set it so they have to login? or auto login?

Also you posted in the wrong section.
