You need a bot if it is your own server. I'd recommend either nightregulator ( http://www.nightregulator.co.uk/ ) Or Brenbot ( http://www.brenbot.com/ ). They should have instructions on how to use them.

If you are not running FDS, press ~ and type kick <player id> to kick a player.

Basicly, you can do anything the bots can do. Just with a little experience with the Commands...

or u could leave it simple and press F8 and type kick (username)
with no !
