I dont have either Cp1 Or Cp2, I recently got a new computer
I have rengaurd installed, but when it goes through the Pre-Cp check, I get errors, and it disconnects.

I need step by step ways to get them installed properly, dont just post links and expect me to know how to do it manually.
Im a retard like that.

When you installed Renegade, did you bother to play the game? Get the patch from ingame? then install RenGuard?
