[12:21] Welcome to RenGuard , Aric!
[12:21] To launch Renegade, please click 'Renegade'.
[12:22] You have joined Jelly-Server.com [AOW2].
[12:22] Bad/Corrupted file game.exe has been found in your renegade directory

That's just a bug, Nothing to worry about.

A restart can usually help to fix it.

Cya in-game.

afaik this happens if youre pressing "Renegade" button too fast after renguard is loaded (and so joining a game too early / before renguard checks are done).
this should only happen if using any direct connect feature (like GSA for example) anyways.

so when using GSA try waiting some seconds after renguard shows up until the checks are done.
