
Subject: [model/replacement]weapon replacements for renegade

Posted by [Urimas](#) on Tue, 30 Jan 2007 11:00:44 GMT

[View Forum Message](#) <> [Reply to Message](#)

hi im new and i like making weapon replacements for renegade
so heres one i made so far ill make more

This is the G36 Large

<http://img261.imageshack.us/img261/8432/g36largesf7.png>

File = <http://www.ihud.com/file.php?file=files/300107/1170156407/G36+Large.zip>

includes the

1st person model

3rd person model

back model

texture

and reload animation

next the Famas

Subject: Re: weapon replacements for renegade

Posted by [Zion](#) on Tue, 30 Jan 2007 12:06:33 GMT

[View Forum Message](#) <> [Reply to Message](#)

Nice one.

Looks like the hand positions could do with a little tweaking but all in all, a good first one

Subject: Re: weapon replacements for renegade

Posted by [Urimas](#) on Tue, 30 Jan 2007 12:32:45 GMT

[View Forum Message](#) <> [Reply to Message](#)

ok the famas is done! and it rocks i love using it

<http://img254.imageshack.us/img254/4300/famasic6.png>

File = <http://www.ihud.com/file.php?file=files/300107/1170160321/famas.zip>

[View Forum Message](#) <> [Reply to Message](#)

lol hand positions aint my top concern
next im doing the Dragunov SVD sniperfifle

Subject: Re: weapon replacements for renegade
Posted by [Urimas](#) on Tue, 30 Jan 2007 13:55:22 GMT
[View Forum Message](#) <> [Reply to Message](#)

ok Dragunov is done looks good

<http://img225.imageshack.us/img225/6282/dragunovze7.png>

file = <http://www.ihud.com/file.php?file=files/300107/1170165204/dragunov.zip>

Subject: Re: weapon replacements for renegade
Posted by [Jerad2142](#) on Tue, 30 Jan 2007 14:19:43 GMT
[View Forum Message](#) <> [Reply to Message](#)

Third Person hand positions can not be changed with out changing the entire animation sets for the charter (walking running, both the animation with you pointing it up into the air and at the target), the only easy way to fix it is to change the gun it self but, then the gun won't look right.

Do these guns have a 1st person animation?

Subject: Re: weapon replacements for renegade
Posted by [Urimas](#) on Tue, 30 Jan 2007 14:54:36 GMT
[View Forum Message](#) <> [Reply to Message](#)

yep they use there replacments animation!

next is the benelli shotgun!

[View Forum Message](#) <> [Reply to Message](#)

yeah i know i cant texture all the way round the model so i do it at its sides next is the chaingun replacment to the M249 Saw
but there better then the original guns right these are more fun to use i love the famas so far it makes the tib rifle feel better

Subject: Re: weapon replacements for renegade

[View Forum Message](#) <> [Reply to Message](#)

Urimas wrote on Tue, 30 January 2007 16:06yeah i know i cant texture all the way round the model so i do it at its sides next is the chaingun replacment to the M249 Saw but there better then the original guns right these are more fun to use i love the famas so far it makes the tib rifle feel better

Yeah, that's what unwrapping is for, you take a 3D model and make a 2D 'net' out of it, like those card boxes you done in school, but digitised.

[View Forum Message](#) <> [Reply to Message](#)

Dude I love you, CSS Models for Renegade!

They all look sweet! I might use a few.

Think you could make a ak-47 model for the auto rifle?

Subject: Re: weapon replacements for renegade
Posted by [Urimas](#) on Tue, 30 Jan 2007 18:46:56 GMT
[View Forum Message](#) <> [Reply to Message](#)

i feel so loved ok im working on a spas12 now then a ak47

Subject: Re: weapon replacements for renegade
Posted by [Zion](#) on Tue, 30 Jan 2007 18:54:02 GMT
[View Forum Message](#) <> [Reply to Message](#)

I don't mean to be rude but how are you building them so fast?

Are they actually 3D models or just planes? Or have you already built them and archiving them in packs?

If they're already built why don't you organize them into folders and zip the whole lot?

Subject: Re: weapon replacements for renegade
Posted by [Urimas](#) on Tue, 30 Jan 2007 19:19:53 GMT
[View Forum Message](#) <> [Reply to Message](#)

i have all the models ready from an old project.
what gun is your favorite so far?

and im fast cuz i built myself a quick use template

What programs are you using? and could you write a walk through on how to model one of the guns? and the skins are some of the best weapon's skins I've ever seen

Subject: Re: weapon replacements for renegade
Posted by [Veyrdite](#) on Wed, 31 Jan 2007 06:26:06 GMT
[View Forum Message](#) <> [Reply to Message](#)

can you upload them elsewhere then file-factory?
(please)

edit: found some bugs. all the ones that i could download (not at ff) can miss easily. simply walk up to ai (easier on your team) and get as close as possible without your gun moving backwards, then shoot at the head. easy miss\

you guns also look very small. you should try raising them on the bones.

not yet but when ive done alot of weapons im gona ask renguard to allow them

Subject: Re: weapon replacements for renegade
Posted by [Zion](#) on Wed, 31 Jan 2007 11:55:38 GMT
[View Forum Message](#) <> [Reply to Message](#)

So all you're doing is rigging the weapons?

Are you giving any credit to the original makers of these models? and do you have permission to use them?

(No wonder he's getting new ones out so fast, he doesn't make them he only rigs them.)

Subject: Re: weapon replacements for renegade
Posted by [Urimas](#) on Wed, 31 Jan 2007 12:13:12 GMT

Respect for doing what everyone always wanted, but what noone ever bothered to do.

A while ago i created this topic about the beta pistol
<http://www.renegadeforums.com/index.php?t=msg&th=22293&start=0&rid=2> 1982
Could you please extract the model and give it the love and attention of your boning template
(wich is a great idea, and if you feel like should be made public).

Subject: Re: weapon replacements for renegade

[View Forum Message](#) <> [Reply to Message](#)

if you have the model and texture of it id gladly remake it for you. just upload it as an attachment
and ill give it a go

EDIT: nvm i have the model now boning now just wait

Subject: Re: weapon replacements for renegade

[View Forum Message](#) <> [Reply to Message](#)

weeeeeeeeee, tnx!

this is what i tried, but gmax is being a retard on me.

```
import the beta pistol
import the default pistol wich is boned and such
put the beta in the place of the original
rid the original
rename everything properly
export
```

this sounded like an ok idea to me, but gmax has this nasty habit to refuse to do what i want...
ofcourse i dont blame my lacking stills, when its way more convenient to blame the software.

[View Forum Message](#) <> [Reply to Message](#)

Cewl,

With the new bloom effect it looks like the bar has some neon effect, wich ofcourse is pro, for obvious reasons.

It seems you have forgotten to include the 3rd person model, since it's present on the screenshot but not in the zip. Also, there's no need to include the texture in the zip, it's present by default. This would save you an amazing 5 seconds of uploading.

Keep it up

Urimas wrote on Sun, 04 February 2007 03:19 the desert eagle texture is in there with it its called DesertEagle.tga

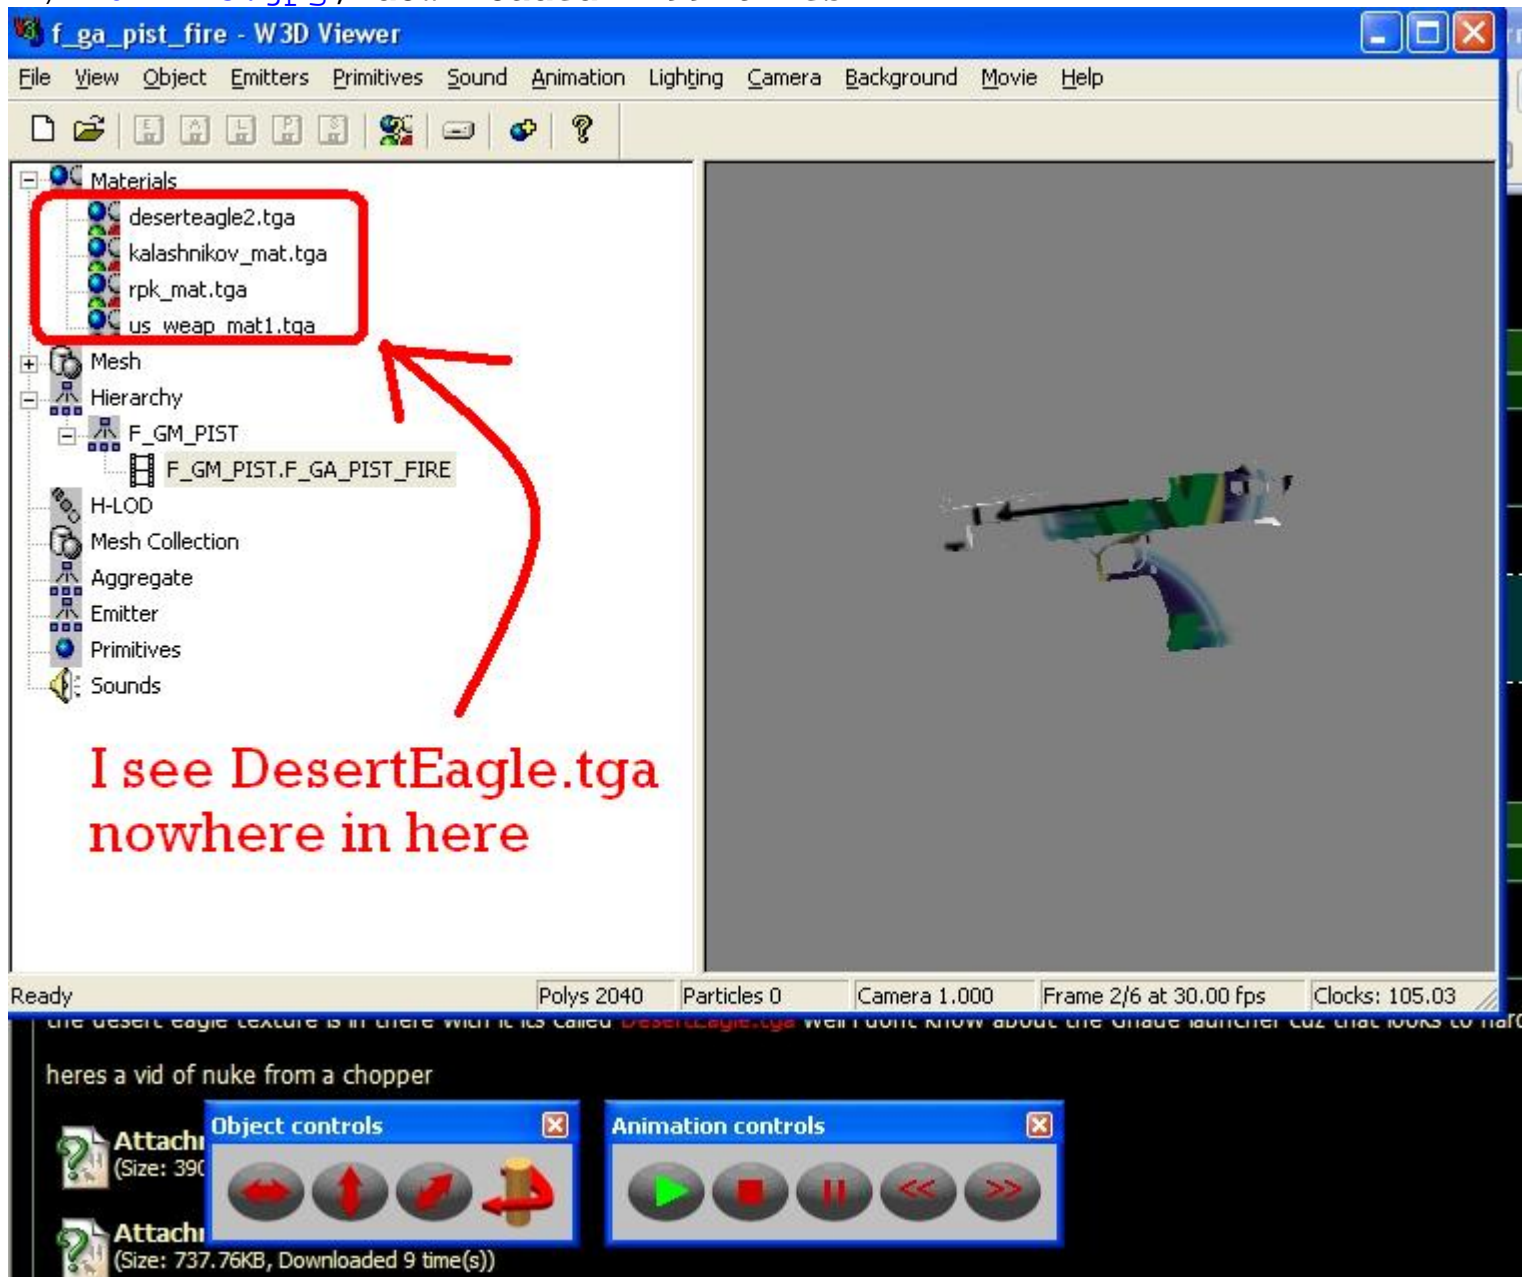

Hmm... I beg to differ

You should really include all assets of a model. And don't get me wrong, I love everything you've done up to this point, but I'd like all the textures needed to make this thing work.

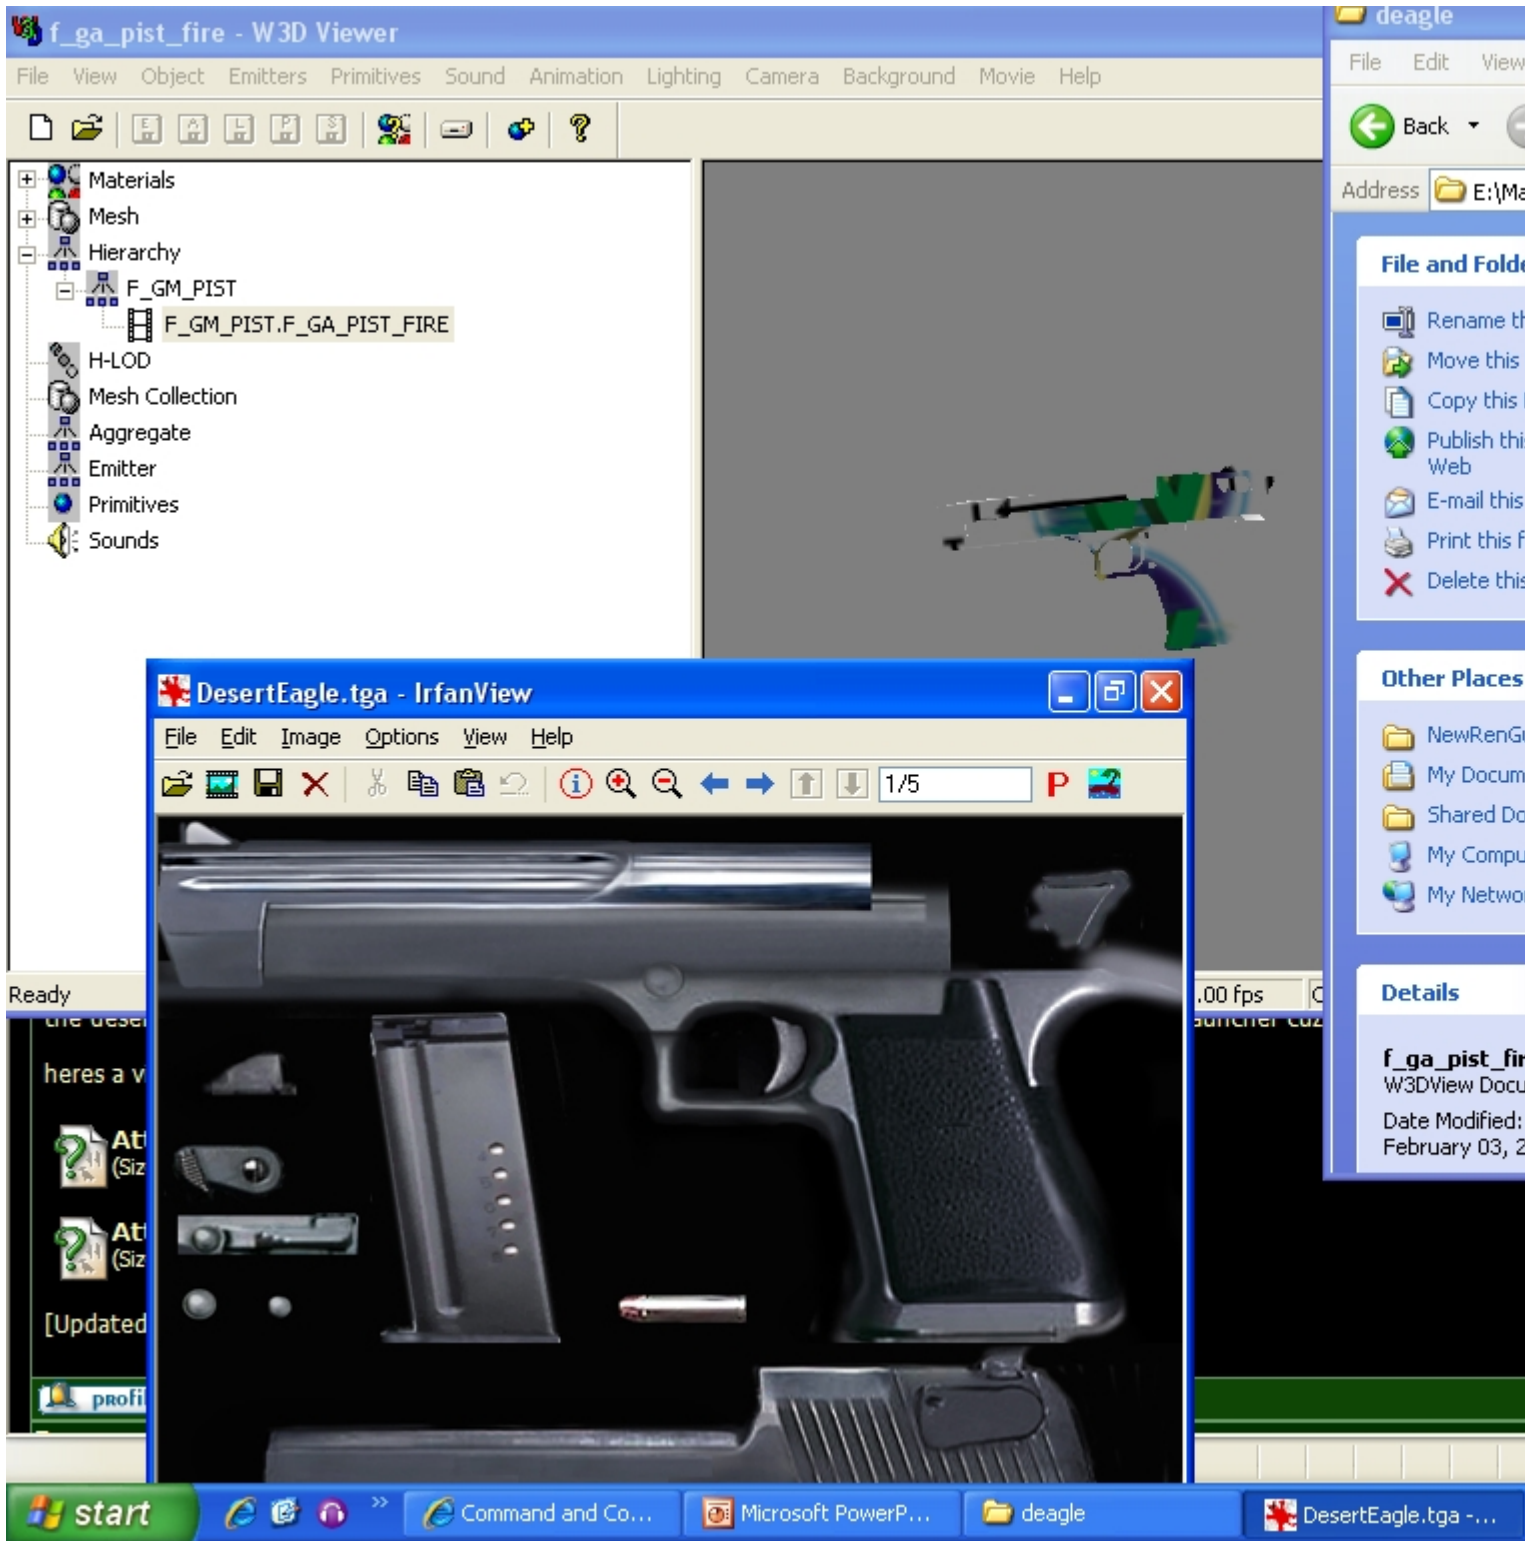

And to prove I'm not the inept one here, I have a photo of everything I should need open.

That gun looks 1337.

Personally, I think renegade is as much high definition as possible. Just the models have poor texture

Also, slapping people, with guns and stuff, would be 1337. in gears of war on xbox, you can slap people, they get stunned, you slap em again, and they get downed. You have like 10-60 seconds for them to get revived (depending on host settings) and you can curb stomp them, looks hot, or shoot them or slap em again Lots of fun. Also would be nice with headshots would mean that that the heads would pop off, the corpse would stand still for a sec or two, and then the body would fall, pretty nice shit.

Something like this would be incredibly difficult. The teams from Cnc Reborn and Red Alert: A Path Beyond, have looked into this and deemed it impossible. And these guys have done amazing things.

So if i can use them in a map mind geting all this file's together for me and put them all in one place to i can download them plz.

Just make a post with all the download link's in one all that you got so far i will download them and get working on some single player map's for them got some good idea's in mind.

Btw i love your pic gun and the 500 sniper gun and the ram.

Btw i got like a \$1 or so on this card i got and would love to help you out and get you a gun model i will post a pic of one and see if you can do it and if you can we will get in touch.

Hey can you make this turnet into a GDI Turnet and a Nod Turnet plz.

Love the guns. Stick to those, as those don't alter the game so much that you could be accused of cheating.

Another thing. Could someone change the bullet for the Tiberium Flechette rifle so that I don't have Tiberium Shards coming out of my P90? Sort of like what you did for the Famba.

There is a timer on the forums. After so long, you can't edit your post anymore. 30 minutes look at the times on those, one is just fifteen minutes after the other.

There is problem's with the Prox mine's they don't show up i mean they show up but u can't target them and disarm them why?

Everything else work's gr8.

Also is it ok for me to upload this place's? your name will be on the btw and in the readme.

EDIT: here is a vid of handless p90 what do you think?

ill do all my guns like this looks nice to me

If you can do no hands, can you set it up so the hands actually reload the gun like they should (instead of pulling a nonexistant Tiberium clip from the bottom)? Currently I'm using the P90v2 models and the nohands reload, so my hands disappear when I reload

Also, is the bullet done? I couldn't tell in the video.

[View Forum Message](#) <> [Reply to Message](#)

well not yet im working on a PKG of all renegades default maps but with modern weapons

both gdi and nod get the same things so its fair!!!
guns im adding are:

m16a2
ak47
famas f1
p90
minigun (not chaingun)
desert eagle
glock
g36k + extended version
m16a2 + m203
Law Rocket Launcher
Rpg
m79 granade launcher
and many more!

[View Forum Message](#) <> [Reply to Message](#)

hmm... Are you changing the map, or just giving us all guns? Guns would be prefereable, because as much as I love the weapon models u make, I wouldn't be willing to replace maps just for some guns. If you do release the maps, a seperate release of just the guns would be greatly appreciated.

1. Coule we have the models without the "realistic damage"? I want to use these guns online and I don't plan on getting banned for damage hacks any time soon.
 2. Hands would be nice.
 3. With the dual wielded weapons, its possible to model them, but I don't think it's possible for both of them to shoot. I beleive only the right one can shoot.

I know your turning out lots of quantity with your weapon models and textures, but if i were you (which im not) I would be practicing on turning out a few high quality models compared to the many, many that you have done in a few days. Most of my models take up to a week each and turn out looking like this:

Quality is better than quantity!

lol, a .mix/.pkg with all them weapons? Awesome.

Hey, if you don't have custom terrain for a level, I can always make you one. These weapons are awesome, so I'd probably make a DM map. I have an idea in mind, but I'd like to have your approval of me even making the terrain first .

If you want, we can talk over AIM/xfire. Name is Cabal8616 on both (Yes, unexpected, isn't it).

Oh, and thumbs up on all the weapons.

Urimas wrote on Fri, 23 February 2007 07:05well theres another thing i can only animate if the habds are part of the model the real hands are way off the screen xD

You have to modify the f_ha_ models to get the hands to animate, f_ga_ is for the weapon animations.

Posted by [Urimas](#) on Sun, 25 Feb 2007 21:00:06 GMT
[View Forum Message](#) <> [Reply to Message](#)

well the maps are unusable so im having a go at making my own
heres a pic of it (still in progress)

<http://img401.imageshack.us/img401/5648/mapsofarao5.png>
nod at the top gdi at the bottem uabove gdi is a Cave (good for tank and infantry battles) the mountains near gdi will have a tunnel network in them same for nod side and also attack helicopters will be on the small island (need transport choppers to get there) and i'll add trees and other stuff to.

Subject: Re: weapon replacements for renegade

[View Forum Message](#) <> [Reply to Message](#)

I am gona round the map out more and I need to add more mountains mabye even a ruined city

for infantry to blow each others brains out in (getting more ideas WOOT!!!)
iv'ed rounded out the land so it looks better

<http://img528.imageshack.us/img528/4282/mapsofarff1.png>

Subject: Re: weapon replacements for renegade
Posted by [GEORGE ZIMMER](#) on Mon, 26 Feb 2007 00:19:25 GMT
[View Forum Message](#) <> [Reply to Message](#)

lol that looks pretty cool. I was planning on a city DM as a seperate map. This should be a .pkg using only temp. Using the "add" button in LE is always a stupid idea anyway

But that looks pretty tight. Any new vehicle plans?

Oh, and give the Nod base some more protection. A bit unfair that GDI has all that mountain to protect em. You can also always send the map to me and I can redo it some for ya, if ya like.

Wow that brings back memories of when I first started. Do you know how to use Vertex Paint? If not I will tell you how (using vertex pain allows you to blend the textures).

Subject: Re: weapon replacements for renegade

[View Forum Message](#) <> [Reply to Message](#)

sweet tell me

Subject: Re: weapon replacements for renegade
Posted by [Jerad2142](#) on Mon, 26 Feb 2007 01:26:04 GMT
[View Forum Message](#) <> [Reply to Message](#)

Step one Select Vertex Pain in the modifier List, then click the "VertCol" and "Shaded" Buttons. Click the brush and select a color (darker make the first material more opaque).

Second Make the texture and give it two passes:

For the first change nothing but the texture (this will be the black color).
For the second pass change the shader to alpha blend:

And give it what ever texture you want (this will be the white color, so check display).
I remember my first 13 mods none of which had blended textures (all I had was dial up so I did not bother with forums).
So if you have any other question ask and I will help you out.

[View Forum Message](#) <> [Reply to Message](#)

Umm, that city will be underused because its at the side of the map, make it in the middle so you have to go thru it to get the the other base.

Also, try out this tutorial.
<http://renhelp.net/index.php?mod=Tutorials&action=view&id=21>

Thats the tutorial that helped me most when starting out. I would reccomend doing a smaller map for your first map and try to stay in the box untill you get the hang of things. Im speaking from experience, but you dont have to listen.

looks good but i dont realy like to repleace renegade weps

Subject: Re: weapon replacements for renegade
Posted by [atomar123](#) on Sat, 03 Mar 2007 12:16:01 GMT

[View Forum Message](#) <> [Reply to Message](#)

Yes.. like in this video you released!

The M16 as the standart Rifle & the Grenade Launcher as the ähm as the Grenade Launcher! ^^

Also ...some little question I want to know :

1.)Is it possible to displace the Rene Grenade Launcher Position (default 6) under the the Rifle Section (default 2), but directly under the rifle, second position, before the chaingun appears?

2.)Also someone knows were I can give havoc a higher jump?... I wanna make him jump twice as high as he does now.

3.)Were can I change the range of the Mammoth rockets?

4.) Is it possible to included a second rifle in renegade?

One for GDI & one for Nod & then make them both useable, but seperated form eachother.
(Like The Soviets AK47 & the Allies M16 in A Path Beyond)

So that havoc will be able to use 2 diffrent rifles in Renegade, but with the same ammo?

Subject: Re: weapon replacements for renegade
Posted by [Urimas](#) on Sat, 03 Mar 2007 23:16:34 GMT

[View Forum Message](#) <> [Reply to Message](#)

1 = no

2 = erm no again

3 = still no

4 = sorry to say it but no

unless you make your own .PKG then no you cant.

next havoc replacement Halo Master Chief

[View Forum Message](#) <> [Reply to Message](#)

I don't mind about Renguard...

so can you tell me how I can do that?

Subject: Re: weapon replacements for renegade
Posted by [Sn1per74*](#) on Tue, 13 Mar 2007 23:30:36 GMT
[View Forum Message](#) <> [Reply to Message](#)

uhh.. I haven't modded an object.ddb in a few years. But try going into Level Edit and editing the presets and you'll find it. When your done save the mod, go to your mod folder and take out the file called objects.ddb and stick it in the Renegade Data folder and play and it will work if you did it right. But keep in mind that if you have the object.ddb in your data folder no servers will show up in multiplayer until you take it out of your data folder.

Urimas
please put the beta Nod Soldier ingame
the textures for it are in XCC Mixer under the Original nod soldiers texture
all you have to do is bone it i think
this would be much appreciated

[View Forum Message](#) <> [Reply to Message](#)

I thought I'd have a go at putting the beta soldier in-game. It's not very good, as the beta skin layout is totally different from the ones we have now, so deal with it.

[View Forum Message](#) <> [Reply to Message](#)

The dds has an odd filesize wich my computer does not seem to like.

edit: For some random reason the mip maps were screwed, I took the freedom to regenerate them. For the rest, it's still the exact same picture Canad made.

I really dislike the Renegade Rocket Launcher.
Can't you make a replacement for the Rocket Launcher, Urimas?

Maybe a Stinger or a Bazzoka or something...

Maybe something like this modified Stinger with somekind of rocket magazine?
Then it could carry 6 mini-rockets.

Agreed. Through trial and error i have noticed the same trend.

I disagree. Textures do have a large impact but if you have a shit load of polys it will slow it down alot.

You've been using the sniperrifle.gmax example that came with the mod tools? It might be a convenient template.

Where do i find the template? I've looked in all the directories for gmax and renX, but still no luck in finding any .gmax files, sorry to be a bother.

EDIT: nevermind, I found it easily by looking in the tutorial area of renegade tools, stupid me.

just 30min later and it wont lemme edit my post, sorry for double posting, but i noticed like Canadacd told me before to add muzzle, eject and those settings, but i'm not sure how to manually add those, i tried looking in the gmax sniper like you told me to Slave, but I'm still clueless on what to do.

Sorry, I have no clue what to do either. I'm still very rookie at modeling. The only thing i've been doing is puzzling with existing reference files. No things of my own.

Meh....i tried playing with the model of the alien gun posted earlier, i've always wanted that was a

auto rifle replacment, but now thinking, it would be awsome as rav's laser rifle, or just keep it as a automatic machine gun....still nothing i can do...

nah its the gun from Alien 2. but u were close.

He was so close, he was right. It's originally from Aliens, it's also the gun you start out with in AvP and AvP2.

there's an AVP2? only one i know of is the stategy one (imho its bad)

edit: Jamie, i can't find a texture for it... if anyone could find a texture for it you'd be my best friend!!! not really but i'd be rly grateful. I WANT!!!!!!!

I can deliver a nice handheld Minigun Model from James Bond Nightfire, but I need someone to rig it and to tell me which files are needed...

It would need new handpositions and maybe a reload and fire animation..

Anyone interested in doing it???

AoBfrost wrote on Sun, 10 June 2007 19:31jamirg could you help me with my ramjet replacement?

It's easy to make bones. All you do is make a cube, and align the pivot inside it. Make sure the pivot is aligned with the world as well. The cube can be any size. Then you just name it for what it is. For eject it's EJECT, and for the muzzle bone it's muzzlea0. For the first person model those are the only bones you need.

A helpful tip. Take a weapon similar to the one you are making. Lets say you are making an m16 or something. Extract the auto rifle from the always.dat (f_gm_rifl.w3d) into renx. Then import your model into the scene. Now you can size your model and get a general idea of how big it will be when you put it ingame.

After you size your model just align it's grip (here the character's right hand will be) with the auto rifle in this case. This should be right at the 0,0,0 co-ordinates of the scene btw. Then select your model align the pivot at 0,0,0 to tell the game where to hold your weapon. Delete the autorifle mesh. Move the bones that came with the auto rifle to the appropriate spots. Eject should be on the one of the sides and muzzle should be at the tip of your weapon. Now export as a hierarchial model and select both smooth along vertex and optimize collision. DO NOT SELECT USE EXISTING SKELETON THAT IS FOR ANIMATIONS.

Hope that helped a bit, feel free to post more or pm me with questions.

I really should be making a weapon replacement tutorial shouldn't I...

Also, atomar can you pm me the link to that model/ upload it for me.

Jamie

AvP: <http://www.planetavp.com/avp/screenshots/>

AvP2: <http://www.planetavp.com/avp2/screenshots/index2.shtml>

Both are very good games. The strategy game is called AvP: Extinction.
