How can I make the arrows that are above a pokable vehicle or PT in 3d? I had such skin once but I can't seem to find it anymore...Can someone tell me how to do it and what skin it is?

Attach the script "JFW_Pokable_Object" to the object.

Tankkiller knows what I'm talking about

What's the skin name?

I guessed that was what he was talking about but it is simply more common for people to ask about the script.

Anyway it's "hud_obje_arrow.dds"

I saw another that could possibly be it but I'm pretty sure its this one (the other one looked like it was for the radar). If it is not this one tell me and I will give you the name of the other.

Ok thanks, but one more question:

Do I have to change the w3d arrow object to make it look 3 dimensional?
