aohost.co.uk
neronhost.net

The best place is on a dedicated server you rent. The cheapest place is aohost.co.uk probably.
You always get what you pay for though.

As said: most of us rent directly at a data center. www.theplanet.com is a popular one in the US
(US-based ofcourse). I see you're in Amsterdam, there's some good ones out there as well.
http://www.leaseweb.com/ is one of them.

Do realise that for a dedicatd server in a data center, you'll pay about 100 € per month. What
hosting companies like aohost do is rent a dedicated server but put multiple renegade servers on
it, so you need to split performance with possible lag as result.

As said: depends what you're looking for.

Edit: other advantage of aohost and maybe neronhosting (donno them) is that they setup the
server for you, so u don't need to worry about that.

About only 2: this game is over 5 years old...

I suggest in finding a cheap dedicated box to buy, Because you have FULL access, And you can do whatever the hell you want.

Tho, If your looking to spend some cheap €€€ try looking at neronhost.com or aohost.co.uk.

aohost.co.uk has Remote Desktop access, Tho your server *will* lag at times.. Neronhost is done through FTP but hardly any lag. Sometimes you have to bite the bullet.

Both hosts are cheap, Should check out there sites and see if you like there pricing.

Well, here (somewhere near Arnhem, Dutch city) AOhost lags quite much, so I couldnt recommend that.

Just so you know, I own NeronHost.com -- I offer FTP with control panel (soon to be released -- not availble right now)

Currently, I sell C&C Renegade servers at $1.10 Per Slot, with a free teamspeak server (50 slots)No setup charges, if your interested, PM me on forums or MSN --> seargentsarg@hotmail.com

I am cheaper than that of AOHost, we don't offer RDP (remote desktop)which as stated above, does lags allot when it happens, we have guaranteed no lag or your choice of money back or increased slots, we moniter servers allot, even offer to help up if you have no damn clue of what your doing... We also have fast support, I am available through MSN 15 hours of the day. I leave it on 24/7.

Just so you know... It is only recommended to buy a server through me if you can't afford to get a dedicated server ($150+ for a decent one.)

Any questions?
