I just joined Jelly-Server Mappack and I got this:

I don't have any hacks or whatever and I'm using the Renguard Beta, what's wrong?

I got booted from Jelly about 9 times in a row for it in a few minutes before I just gave up on the new beta. :\

i guess there are just some small bugs / false positives regarding radarhack on this new beta which need to be fixed since radarhack detection is new and not that trivial!

just be patient and wait for the final release. im pretty sure this detection method is the right way to go!

regards
